| THE REPLY FILED 22 September 2003 FAILS TO PLATHEREFORE, further action by the applicant is required to a final rejection under 37 CFR 1.113 may only be either: (condition for allowance; (2) a timely filed Notice of Appel Examination (RCE) in compliance with 37 CFR 1.114.   | avoid abandonment of this appli<br>1) a timely filed amendment wh   | cation. A proper re   | ply to a ·<br>cation in                    |
| PERIOD FOR RE  | EPLY [check either a) or b)]  |   |  |
| a) The period for reply expires 3 months from the mailing date of this Ad event, however, will the statutory period for reply expire later the ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS 706.07(f).  Extensions of time may be obtained under 37 CFR 1.136(a). The data have been filed is the date for purposes of determining the period of exter 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortene  | visory Action, or (2) the date set forth in the nan SIX MONTHS from the mailing date of FILED WITHIN TWO MONTHS OF THE on which the petition under 37 CFR 1. Insign and the corresponding amount of the | of the final rejection. E FINAL REJECTION.  136(a) and the appropriate of fee. The appropriate ex | See MPEP e extension fee tension fee under |
| <ul> <li>(b) above, if checked. Any reply received by the Office later than three meaned patent term adjustment. See 37 CFR 1.704(b).</li> <li>1. A Notice of Appeal was filed on Appellant</li> </ul>   |   |   | , may reduce any                           |
| 37 CFR 1.192(a), or any extension thereof (37 CF   | R 1.191(d)), to avoid dismissal   | of the appeal.  |  |
| 2. The proposed amendment(s) will not be entered to  | pecause:  |   |  |
| (a) \( \square\) they raise new issues that would require furth  | ner consideration and/or search   | (see NOTE below);   |  |
| (b) they raise the issue of new matter (see Note   | below);   |   |  |
| <ul><li>(c) they are not deemed to place the application<br/>issues for appeal; and/or</li></ul>   | in better form for appeal by ma   | terially reducing or  | simplifying the                            |
| (d) they present additional claims without cance NOTE:   | ling a corresponding number of  | finally rejected clai   | ms.  |
| 3. Applicant's reply has overcome the following reje   | ction(s):   |   |  |
| <ol> <li>Newly proposed or amended claim(s) would canceling the non-allowable claim(s).</li> </ol>   | d be allowable if submitted in a  | separate, timely file   | d amendment                                |
| 5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for application in condition for allowance because: S   |   | sidered but does No   | OT place the                               |
| 6. The affidavit or exhibit will NOT be considered be raised by the Examiner in the final rejection.   | ecause it is not directed SOLELY  | to issues which we  | ere newly                                  |
| 7. For purposes of Appeal, the proposed amendmen explanation of how the new or amended claims w  |   |   | and an                                     |
| The status of the claim(s) is (or will be) as follows  | :   |   |  |
| Claim(s) allowed:  |   |   |  |
| Claim(s) objected to:  |   |   |  |
| Claim(s) rejected:   |   |   |  |
| Claim(s) withdrawn from consideration:   |   |   |  |
| 8. The proposed drawing correction filed on is   | s a)□ approved or b)□ disap   | proved by the Exar  | niner.                                     |
| 9. Note the attached Information Disclosure Stateme  | ent(s)( PTO-1449) Paper No(s).  |   |  |

10. Other: \_\_\_\_

.

Continuation of 5. does NOT place the application in condition for allowance because: Applicants' argument are not persuasive since the "union" 16e which joints two pieces as argued by applicant functions as a flow restrictor that alters the fluid flow. Obviously, the fluid flow is altered because the inside diameter of the "union" 16e is smaller than the line the supply line 16 inside the body as shown in Fig.1 of Fellows. The pressure inside the line is reduced when the fluid flows from the smaller diameter to a lager diameter and is inherently increased when a hole on the surface of the printing cylinder is covered. Kay is cited to show a specific flow restrictor as recited in claims 3-5 and 7-19. As explained in the previous Office Action, Kay teaches the conventional use of the fluid flow restrictor which alters the fluid flow and creates vortices (Kay, Figs.2 and 9), and it would have been obvious to one of ordinary skill in the art to modify the printing cylinder of Fellows by providing a fluid flow restrictor as taught by Kay et al. to permit more precise control the fluid flow in the cylinder for mounting or replacing a printing sleeve. Therefore, the combination of Fellows and Kay renders obvious the structure as recited in claims 3-5 and 7-19.
